

Math classes went well both of these weeks. The contest for pizza party is in full swing, with the High School class in the lead for the moment. Please allow for the students to take time each day with the Khan Academy program so that we can continue to fill in any learning gaps they may have in their arithmetic.

High School Math	
Building and Solving Equations	 <p>Data available from U.S. Geological Survey, EROS Data Center, Sioux Falls, SD</p>
Recognize equations in real world	
Understand how to work equations in reverse	
Determine opposite actions in equations	
Project: Determine the unknown length of a paper using measurable objects in the room. Students completed correctly with limited help.	
Pre-Algebra	
Add uncommon fractions	
Subtract uncommon fractions	
Determine common denominators	
Understand multiplication of fractions	
Multiplication as division	
Start understanding of fraction division	
Study Hall	
Make sure students are bringing work	
Khan Academy is good if EF/parent desires	
Students are working hard
